NEWS FLASH: Best Buddies Challenge Ride, from Carmel to Hearst Castle

Expect bicycles and caravans all day on west side of fire, increased bike traffic on east side

INCIDENT	
OBJ FCTIVES	

1. Incident Name
Soberanes Fire

2. Date Prepared 09/9/16

3. Time Prepared 1900

4. Operational Period - 09/10/2016 0700 SAT - to - 09/11/2016 0700 SUN

### **Management Objectives:**

- Provide for firefighter and public safety through the application of sound risk management analysis and the implementation of appropriate mitigations.
- Protect communities, infrastructure, utilities, improvements, historical assets, and the Ventana watershed by keeping the fire:
  - Inside the current perimeter in Branches I, II, and IX to protect infrastructure in adjacent communities.
  - North of Nacimiento-Ferguson Road to limit fire growth to the south at the point of greatest opportunity
  - West of Carmel Valley and Reliz Canyon to avoid impacts to the communities along the Highway 101 corridor and Fort Hunter Liggett Military Reservation
  - East of the Coast Ridge Road to protect values within the visual corridor of the Highway 1 National Scenic Byway.
- Assess suppression repair needs on federal lands and implement where safe and appropriate.
- Provide initial attack assistance at the request of Monterey Ranger District of the Los Padres National Forest.
- Ensure cost containment measures are identified, applied, and documented.
- Enhance community relationships through respect, engagement, communication, and trust.
- Keep public informed of incident status
- Prepare for Transfer of Command at 0600 on September 13.

### **Control Objectives:**

- Secure the southern edge of the fire along the Coast Ridge Road in Branches VII and VIII.
- Evaluate options for containing fire spread to the east and northeast in order to protect values on inholdings within the Wilderness, and to the north in the Carmel Valley.
- Evaluate the effectiveness of aerial resources to check fire spread and consider the use of direct, indirect, and burnout tactics where risk to firefighters can be effectively mitigated.
- Work with agency administrators and cooperators to develop alternate and contingency plans for containing fire spread to the east and south.
- Avoid adverse effects to the Ventana Wilderness area by using minimum impact suppression tactics (MIST).
   Where opportunities exist, use natural features and pre-existing containment lines. Consult with resource advisors to ensure tactics are compatible with social, economic, and environmental values.

### **Command Emphasis and End-state:**

Communities and other values at risk are protected with a combination of direct and indirect tactics to suppress the fire. Existing or, historic fire lines are used for control purposes to minimize resource effects to wilderness. Life First Doctrinal Guidelines and Chief's Intent for 2016 and implement the right plan at the right place at the right time with the right assets for the right duration and the right reason in order are followed to achieve objectives with minimum firefighter exposure.

#### **Situational Awareness:**

Incident personnel understand daily operational direction for all phases of the incident. Personnel take responsibility for their own personal safety as well as the safety of others, and take corrective action where appropriate. Everyone assigned to the incident understands their roles and responsibilities within the incident medical plan and the incident emergency plan.

Stop, think, talk, listen... then act in response to any situation that may represent unnecessary exposure.

### Soberanes Fire Weather Forecast

FORECAST NO: 49 NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Sat. - 0700 Sun. UNIT: CA-BEU/LPF MRD

SHIFT DATE: Saturday Sept 10<sup>th</sup>, 2016 SIGNED: Phil Manuel / Mark Pellerito

TIME AND DATE Incident Meteorologists

**FORECAST ISSUED:** 1900 9/9/16

### WEATHER DISCUSSION: \*\* UNSTABLE TODAY, ISOLATED AFTERNOON THUNDERSTORM POSSIBLE \*\*

Temperatures and humidity at the ground will not be very different from last couple days, and winds will remain primarily terrain-driven. But up above, there is a significant change: Instability. A small upper disturbance will drift north from Baja California, which will allow for unstable conditions and a little more moisture aloft. There have not been clouds above the marine layer in days, but today will actually include a few tufts of clouds and perhaps even an isolated thunderstorm. Pay close attention to the sky and monitor your radio for updates. Very little transport wind today – light east if anything – but with instability, there is support for vertical column growth and also some gustiness to the wind. Still unstable Tonight; then after a quieter day Sunday, a system will drop into the region Monday-Tuesday with increased winds.

### **WEATHER FORECAST For Saturday:**

**WEATHER:** Isolated afternoon thunderstorm possible. Partly cloudy (more clouds lower coastal slope).

**TEMPERATURES:** Highs 85-95 active fire area. 75-85 lower coastal slopes (1-3 degrees warmer)

**HUMIDITY:** 18-28% Branch VII and VIII. 12-18% Tassajara. 28-40% lower coastal slopes. (unchanged)

### 20 FT WINDS:

**RIDGETOP** – East 4-8 mph but with erratic-direction gusts 12-16 mph in the afternoon.

Branches VII and VIII - Upslope 3-7 mph gusts 12-14 mph, except Southwest 6-10 mph with gusts

14-18 mph at coastal ridge 1200-1800.

**SLOPE/VALLEY -** Upslope 3-7 mph gusts 8-14 mph late afternoon.

Marine Layer: 1500 feet with little or no impact on firelines. Haines: 5 - Unstable

### **WEATHER FORECAST For Saturday Night:**

**WEATHER:** Isolated thunderstorm still possible, otherwise mostly clear above 1000 feet; clouds below.

**TEMPERATURES:** Lows 48-54 in the valleys. 58-66 ridges. (unchanged).

**HUMIDITY:** Poor Recovery 25-35%, falling to 15-25% after 0300 in Branches VII and VIII.

20 FT WINDS:

**RIDGETOP** - Northeast 4-8 mph with gusts 12 mph.

**Branch VII and VIII-** Northeast 8-12 mph gusts to 18 mph at ridge; otherwise downslope 4-8 mph.

**SLOPE/VALLEY –** Evening upcanyon 3-7 mph...becoming downcanyon 2-5 mph.

Marine Layer: Under 1000 feet mainly impacting Highway 1. Haines: 5 - Still unstable above ridges

**EXTENDED FORECAST:** Still a little unstable Sunday. Increased winds Monday-Tuesday as a system

passes through. Highs mid 70s-80s Sunday, mid 60s-70s Monday-Wednesday.

<u>Portable RAWS Frequency:</u> 163.350 DTMF tones 0032 for Hot Springs, 0033 Anderson, 0029 Blue Rock, 0038 Chew Ridge, 0039 Tassajara, 0031 Benchmark and 0037 Coastal Ridge.

#### **INPUTS**

### **WEATHER SUMMARY** (see attached forecast)

\*\*\* Unstable today, Isolated thunderstorms possible afternoon into the evening, Partly Cloudy \*\*\*

Temps: 85-95 active fire area, 75-85 lower coastal slopes (1-3 degrees warmer)

RH: 18-28% Branch VII/VIII, 12-18% Tassajara, 28-40% lower coastal slopes (unchanged)

20 Ft Winds: Ridges E 4-8G12-16 (Erratic), Br VII/VIII SW6-10G14-18 aft, Upslope 3-7G8-14 late afternoon

Night: Temp 48-54 valleys, 58-66 ridges. RH 25-35% down to 15-25 aft 0300. Wind Ridge NE 4-8G18, down 2-5.

### **OUTPUTS**

#### FIRE BEHAVIOR

#### **GENERAL**

With Haines of 5, thunderstorms possible, and light terrain winds today, pay close attention to the sky for cumulus buildups and prepare for lightning and downdrafts if you are working on ridges and/or near active fireline.

Fire continues to burn in areas burned by both the 1999 Kirk and 2008 Basin Fires, and further east in fuels burned only once by the 2008 Basin fire. Snags, skeleton brush and heavy downed fuel are abundant and increase fire intensity.

With dry fuels, alignments in shrub fuels will continue to run upslope and upvalley, especially with the forecast instability. Unstable conditions can enhance column development, increase spread rates upslope, and encourage long range spotting across ridges we haven't seen so far.

Head fire spread rates in brush can be up to 1 mph on steepest slopes. 10-20' flame lengths with running fire can be expected. Be aware that these heavy fuels may prompt more rollout on steep slopes where burning actively up high.

ERC 69 1hr 4-6% Pig 70% Spotting up to .2 mile

### **SPECIFIC**

#### **BRANCH III**

Fire in the North Fork of the Big Sur drainage and above Cienega Creek could continue to burn toward the ridges above Tassajara. Open fireline above Willow Creek was not active yesterday, but anticipate rollout from the slope above. Any of these runs could be boosted by the instability in the forecast.

#### **BRANCH IV & VI**

Fire expected to continue to spread above Deer Valley up toward the ridges above Willow Creek and the Arroyo Seco River. Any active spread along the Lost Valley Creek at the mouth of Zigzag Creek could be pushed either way, depending on the winds that may develop.

### **Branch VII, VIII**

DIV N – Now mostly burned out, primary concern for spotting across the line decreases each day. Instability could encourage runs from bottom of Pick Creek.

DIV UU/SS – Most active fire coming out of Zigzag Creek could is getting established in Lost Valley Creek. Fire coming into Lost Valley Creek or on slopes west of Zigzag Creek could find wind and slope alignments, moving toward Higgins Creek

### **AIR OPERATIONS**

Marine Layer under 1000 ft, mainly impacting Highway 1.

#### **SAFETY**

Thunderstorms and lightning are unusual items in the forecast. Might be time to review safety procedures for the possibility they will be reported in the area.

LOOK UP, Be Aware of Hazard Tru	ees.				•		ional nori	nd		

Use headlights. Slow down. Assume there is a vehicle around each corner.

1. Incident Name:

Division Supervisors: fire apportionment validation process will be to call Kris Armstrong at (661) 342-7297 between 0830-1100.

"If you see something, say something." Identify and communicate hazards between day and night shift personnel.

Keep windshield clean to reduce glare from sunlight, communicate with road guards and other vehicle traffic in assigned work locations.

#### 6. Control Operations/Work Assignments:

TASK: Continue to secure Coast Ridge RD from previous firing operations.

PURPOSE: Contain fire activity along control lines, protecting structures and values at risk along Highway 1.

END STATE: All control lines successfully held fire with no infrastructure damage.

#### 7. Special Instructions:

JUSTIN QUERY

Please keep all Dozer lines out of Highway 1 viewshed.

The Communications Plan is complex; please review the ICS 205 with all Division personnel.

Use headlights. Slow down. Assume there is a vehicle around each corner. Look up. Be aware of hazard trees.

Review and understand medical emergency evacuation plan.

DIVS, TFLD and HEQB must account for & certify all hired equipment shift tickets during operational period.

Once ignition begins, only critical resources will be south along North Ridge Rd in front of the ignition group. If the main fire gets established on the south facing slope and Logwood drainage, only critical resources will be in unburned areas.

F P	on to a citaconaco	la ot atail value to el	how four digits after the	the decimal place for	odtio vd bowollo	or an "N" or a "M"	o paipaodo	ythothy.	the freezence vie

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

### **HEALTH AND SAFETY MESSAGE**

#### **SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

For: September 10, 2016

INCIDENT: Soberanes Fire

DATE: September 10, 2016
TIME: Day/Night

NEWS FLASH: Best Buddies Challenge Ride, from Carmel to Hearst Castle Expect bicycles and caravans all day on west side of fire, increased bike traffic on east side

# INITIATE ALL ACTIONS BASED ON CURRENT AND EXPECTED FIRE BEHAVIOR

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
  - Post lookouts.
  - Check communications.
  - Retreat if you have doubts about your escape routes or safety zones or it the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

Thanks from your Alaska Safety Team!!

# **BEST BUDDIES CHALLENGE RIDE**

The Best Buddies Challenge Ride will be Saturday, September 10, 2016 starting at 0700. The riders will head to the Pacific Coast Highway from Carmel to Hearst Castle in San Simeon, CA. All rides are fully supported, with rest stops along the way and numerous police and support vehicles on the road. Rental bikes are also available. The event will help Best Buddies enhance the lives of people with intellectual and developmental disabilities. **100-Mile Ride-**Beginning at the Quail Lodge Golf Resort in Carmel, riders wind their way south along the scenic Pacific Coast Highway. You'll ride over historic Bixby Bridge, pass through Big Sur and trace the coast pass Elephant Seal Beach on your way to the Hearst Ranch in San Simeon. While the terrain is challenging, there are four rest stops along the way (approximately every 25 miles) and official support cyclists and vehicles on the road.

#### Day of Event - Saturday, September 10, 2016

#### 6:30 AM

Shuttles depart Quail Lodge Golf Club in Carmel for 62, 30, and 15-mile start lines.

#### 7:30 AM

100-mile ride starts at the Quail Lodge Golf Club in Carmel 8000 Valley Greens Dr, Carmel-By-The-Sea, CA 93923

Check-in & breakfast opens at 6:00 AM

9:00 AM -62-mile ride starts from Big Sur Station

Big Sur Station, 47555 CA-1, Big Sur, CA 93920

Check-in opens at 7:30 AM

#### 12:00 PM

Hearst Ranch Beach Finish Line is open. Amenities for participants include:

#### 5:30 PM

Early return shuttle departs for transportation back to 100-mile start line in Carmel

**9:30 PM** Shuttle depart BBQ for Sam Simeon and Cambria hotels or back to 100-mile start line in Carmel.

Time Sensitive or Emergency Orders may be called in to Communications on the Command Channel.

# Human Resource Message

Motivation and Complacency

What is motivation? Motivation is the drive that encourages action or feeling. To motivate means to encourage and inspire. Motivation can also mean igniting the spark for action. Motivation is a powerful force. It can persuade, convince and propel you into action. It can be defined as motive for action. It is a driving force in our lives and comes from the desire to succeed. The greatest enemy of motivation is complacency. Complacency leads to lack of effort and thus a lack of success.

Now is the time to keep your eyes wide open for symptoms of complacency. Now is the time to stay motivated. Now is the time to recognize the success that has been achieved and strive for more.

There are six grave dangers of complacency

- 1. Complacency Leads to blind spots
- 2. Complacency Leads to poor quality
- 3. Complacency Leads to Excessiveness
- 4. Complacency Leads to Inaction and Status Quo
- 5. Complacency Leads to Strategic Vulnerabilities
- 6. Complacency Leads to Deteriorating Bottom Line Performance

# As you get ready to "pack" your bags...

Come into Finance to get a draft copy of your time sheet or invoice. This will give you time to review it for any errors (not that we make them).

A little bit of preparation/planning ahead of time makes your demob go much more smoothly.

Thank you all for the hard work that you have done, and continue to be safe during this incident and all of those in the future.

# Archaeological and Historical Sites Fireline Guidance for the SOBERANES Incident

One of the values we protect on our National Forest is Heritage Resources, this includes the preservation of Historic sites, Archaeological sites, and sites with traditional or sacred values.

Known archaeological sites are flagged for avoidance with blue flagging tape and yellow and black stripe flagging tape together. Do not compromise safety for the protection and preservation of archaeological and historic sites. When feasible and prudent:

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
- 2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment. Some sites can be protected through avoidance, or by carefully removing flammable materials adjacent to sensitive features, or by wrapping with protective fireproof fabric.
- 3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- 4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to a Division Supervisor. If feasible, plot locations of discovered resources on a map, and take a gps reading and photograph. Leave the information with an archaeologist (in the READ tent) so that sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or human remains, cease work in the area immediately and contact the USFS Archaeologist. State law requires that the Archaeologist contact the Coroner, who will determine if the remains are part of a crime scene.

## **MEDICAL PLAN (ICS 206 WF)**

#### **Medical Incident Report** FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH. Use items one through nine to communicate situation to communications/dispatch. 1. CONTACT COMMUNICATIONS/DISPATCH Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.) 2. INCIDENT STATUS: Provide incident summary and command structure. Describe the injury Nature of Injury/Illness (Ex: Broken leg with bleeding) Geographic Name + "Medical Incident Name (Ex: Trout Meadow Medical) Incident Commander Name of IC Name of Care Provider Patient Care (Ex: EMT Smith) 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report. Weight: Number of Patients: Male / Female Conscious? ☐ YES □NO = MEDEVAC! Breathing? YES ☐ NO = MEDEVAC! Mechanism of Injury: What caused the injury? Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24' 4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY TRANSPORT PRIORITY ☐ URGENT-RED Life threatening injury or illness. Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE. Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. Ambulance or consider air transport if at remote location. ☐ PRIORITY-YELLOW Serious Injury or illness. Evacuation may be **DELAYED.** Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes Non-Emergency, Evacuation considered □ ROUTINE-GREEN Not a life threatening injury or illness. **Routine of Convenience.** Ex: Sprains, strains, minor heat-related illness. 5. TRANSPORT PLAN: Air Transport: (Agency Aircraft Preferred) ☐ Helispot ☐ Short-haul/Hoist □ Life Flight ☐ Other **Ground Transport: Click here to enter text.** □ Self-Extract ☐ Carry-Out □ Ambulance □ Other 6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS: ☐ SKED/Backboard/C-Collar ☐ Paramedic/EMT(s) ☐ Crew(s) ☐ Burn Sheet(s) ☐ Trauma Bag □ Oxygen ☐ Medication(s) □ IV/Fluid(s) ☐ Cardiac Monitor/AED ☐ Other (i.e. splints, rope rescue, wheeled litter) 7. COMMUNICATIONS: Channel Name/Number Receive (Rx) Tone/NAC \* Transmit (Tx) Tone/NAC Function Ex: Command Forest Rpt, Ch. 2 168.3250 110.9 171.4325 110.9 COMMAND AIR-TO-GRND TACTICAL \*(NAC for digital radio system) 8. EVACUATION LOCATION: Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24' Patient's ETA to Evacuation Location: Helispot/Extraction Size and Hazards: 9. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in REMEMBER: Confirm ETA's of resources ordered Act according to your level of training conjunction with primary evacuation method? Be thinking ahead...

Be Alert. Keep Calm. Think Clearly. Act Decisively.
